U. F. Locals Meet

A combined meeting of St
Plain and Holborn locals was
held Sat. last, with the Stony
Local's president in the chair.

A resolution was passed, in-
viting Holborn's members to
join with Stony's. About 60
were present.

The meeting had been called
for the purpose of electing
delegates to the nominating
convention, and also to decide
date of same.

A motion carried that a
convention to nominate a can-
didate for Stony Plain con-
stituency be called for a date
not later than Thurs. May 15.

A motion was made that the
representation from each
Local be 1 to every 10 paid up
members. An amendment to
this, raising the ratio 1 to 5,
carried. Considerable discus-
sion took place on these mat-
ters, but they were finally
settled to the satisfaction of
all present.

Mr D H Lent, who has been
campaigning thru the consti-
tency for support, with every
prospect of his being a can-
didate at the coming election,
was present, asked permis-
sion to speak, and was ac-
corded the privilege of the
floor. He made a fine address,
stating his reasons for enter-
ing the field, and alluded to
other matters recently printed
in The Sun. He concluded by
stating he would stand on the
Farmers' platform, and prom-
ised in the event of being el-
ected, he would further the
farmers' interests to the best
of his ability. Mr Lent has
in his possession a document
on which appear the names
of over 400 persons who have
promised him their support.

The West Helps the East

The reduced volume of wheat production in Western Canada last year, coupled with the serious tie-up in grain shipments owing to the absence of a profitable export market, has at least had the effect of opening the eyes of Eastern Canada to certain facts which formerly they did not realize, or at all events were loth to admit did exist.

For a long period of years, even in fairly recent years, the opinion was voiced throughout the eastern portion of the Dominion that the West imposed quite a drain on the East, that the East was taxed to provide immigration, transportation, and other services for the West, and for which the East received no adequate return.

Now, apparently, this view is no longer held, for we find such an outstanding Ontario paper as "Toronto Saturday Night," which more or less reflects the financial viewpoint of the city in which it is published, featuring an article which opens with the following paragraph:

"Behind the dark curtain of wheat—the emphasis which has been placed on failure of the last crop to move—the controversy over marketing methods with the resultant propaganda—is to be found the true economic status of the Canadian west. A clear and unbiased examination of the facts—the facts alone dissociated from the passions aroused by factional contention—is vital to east and west alike. Upon such knowledge only can the confidence of the manufacturer in his commitments for the summer and fall months of the year be founded. There is no disputing the fact that the balance between prosperity and a curtailed volume of trade rests upon the West's purchasing power."

The admission, or recognition, contained in that last sentence is certainly refreshing and welcome to the people of Western Canada. Its recognition by the East must undoubtedly mean the rapid development of a better understanding between the vast sections of the Dominion which lie to the east and west respectively of the Great Lakes. And such better understanding is vital to the welfare of Canada.

The second fact which the experiences of the past twelve months have brought forcibly to the attention of the whole country is that the volume of freight traffic provided for our two great transportation systems by the grain shipments of the prairie provinces is an important, yes, a vital factor, in maintaining their net profits at a satisfactorily high figure. Not so long ago, the railway managements contended that rates for western grain carriage fixed by the Railway Commission were so low that there was no margin of profit for them in this class of business; that, in fact, there was a loss taken in the movement of western grain, which loss had to be made up out of other earnings. This, therefore, also constituted something of a grievance in the eyes of eastern shippers.

Now, however, both railways have frankly attributed the drop in their profits, in not merely the gross but the net profits, is to the heavy decline in grain shipments. In other words, they have admitted the profitable nature of the western grain business from a railway transportation standpoint.

These things are deeply significant. It is well known that freight rates on grain in Western Canada are much lower than they are on railways in western grain areas of the United States, and to that extent the Western Canadian farmer has an advantage over his United States competitor in world markets. It is, however, gratifying to know that such advantage is not gained by imposing actual loss upon the transportation companies of this Dominion.

To the West, too, it is gratifying to know that it is a vital factor in promoting the prosperity of the manufacturing industries of the East. That is as it should be. The West desires to help Canada forward. It is anxious that the settlement of its broad acres and the fertility of its soil should result in big and profitable business for the East. The West prefers Canadian-made goods above all others, and it is a source of real gratification to our people to realize that we have it in our power to confer the benefits of increased business and prosperity upon our fellow Canadian citizens east of the Great Lakes.

Out of the troublous times and somewhat bitter experiences of the last season there has come the happy realization, both east and west, of our dependence on each other; of our common interest in the welfare of each other; in our joint pride and concern in the progress and prosperity of our common country.

The United States will show the best features of its "billion dollar poultry industry" in an exhibit to be sent to the World Poultry Congress in London this summer.

Not so many years ago, farmers regarded sweet clover as a persistent weed; now they cultivate it for hay and pasture and to improve the soil.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are overstimulated. Too much acid makes the stomach and intestines sour. Alkali kills acids naturally. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Do prove this for your own sake. It may have a great many disagreeable hours. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Plan Daring Venture

Group Of Japanese Business Men Sponsoring Air Line Across Pacific

A project of inaugurating a regular passenger and air line between Japan and the United States and Canada to shorten the distance between the continents to three days is reported to have been organized by a group of Japanese business men and financed at a capitalization of \$75,000,000. Four huge airships, resembling the Graf Zeppelin, which encircled the globe last year, are expected to be employed for the regular air trips.

The Japanese government has been officially asked for the necessary permits and those behind the enterprise say they propose to go right ahead with their preparations.

Seki Hoshino, noted Tokyo business man and one of the promoters, says the plan was projected last year shortly after the visit of the German dirigible. The single fare for a passenger, he said, would be \$1,500.

"It may take us a year or two to complete organization," said Mr. Hoshino. "International agreements will have to be negotiated. But we are absolutely serious in this undertaking. It is a daring venture, but we believe that it is feasible and we are prepared to go right ahead with it."

RHEUMATIC VICTIM FOR SIXTEEN YEARS

Dr. Williams' Pink Pills Restored Her Health

Rheumatism is a disorder of the blood. Wet, cold weather may aggravate it but that is not the cause. Bad blood charged with uric acid is the reason. Re-build the blood and rheumatism will disappear. Dr. Williams' Pink Pills enrich and purify the blood and that makes good health.

Mrs. John C. McPherson, St. Mary's, Ont., writes:—"For sixteen years I was a victim of rheumatism. For eleven years I was unable to walk. Massage and chiropractic treatments failed. I was utterly discouraged till I heard how strongly Dr. Williams' Pink Pills were recommended for cases like mine. I began their use and in a few weeks the pain lessened, my appetite and color improved, and now I am able to do light housework. It is wonderful what these pills have done for me."

Dr. Williams' Pink Pills do one thing but they do it well—they enrich and purify the blood. This rich blood cures rheumatism, sciatica, neuralgia and neuritis and promotes health and strength. The Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fair Booklet Issued

Under the title "Hints for Exhibitors," the provincial department of agriculture has issued a booklet that deals with the details and preparation of exhibits for the World's Grain Exhibition and Conference that will be held in Regina July 25 to August 6, 1932. Copies may be secured by applying to the department. Hon. W. C. Buckle, Minister of Agriculture, is chairman of the executive Saskatchewan committee.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence, who is infested with worms can take this preparation without a quail of the stomach, and will find in it a sure relief and a full protection from those destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

Law With Teeth

Two thousand Austrians though several thousand miles removed from America are kept dry by a prohibition law with teeth in it. They are persons who have committed small crimes while under the influence of alcohol and who have received sentences which become effective when and if they take another drink.

Douglas' Egyptian Liniment is unrivaled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

An Odd Ornament

A human jaw bone carved with hieroglyphs and made into a pendant is an odd piece of jewelry worn by one of the prehistoric Mayas and found recently by a British archaeological expedition to British Honduras.

W. N. U. 1836

When Babies FRET

There are times when a baby is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's no time when any baby can't have the quick comfort of Castoria! A few drops, and your little one is soon at ease—back to sleep almost before you can clip away.

Remember this harmless, pure vegetable preparation when children are fretting. Don't stop its use when Baby has been brought safely through the age of colic,

diarrhea, and other infantile ills. Give good old Castoria until your children are in their teens! Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness that needs no stronger medicines to relieve. Castoria is pleasant-tasting; children love to take it. Buy the genuine with Chas. H. Fletcher's signature on wrapper.

Fingerprints Are Radioed

Photographs. Also, Exchanged. Between Berlin and Buenos Aires

The police of Berlin and Buenos Aires successfully exchanged photographs and fingerprints by radio.

The prints of a criminal's ten fingers were sent in eight minutes and were received with a clearness which readily permits indexing and identification.

The radio transmission of photographs however, has not yet been so successful, but pen and ink drawings from photographs can be transmitted perfectly. Berlin radioed to Buenos Aires a sketch of its chief of police, and Buenos Aires sent a sketch of its chief of police to Berlin. Both were reproduced excellently.

Establish Reference Monuments

During the summer of 1929, the Geodetic Survey of Canada, Department of the Interior, established fundamental reference monuments in fourteen towns and cities of Saskatchewan and Manitoba. The sites, usually in improved city parks, were granted by the municipalities. Each pier bears a bronze plate on which is inscribed the elevation, latitude, and longitude of the monument as established by the Geodetic Survey.

One advantage the Senators will enjoy now is that for whatever happens they will have a woman to blame it on.

No Moths In Arctic

Woolen Mittens Seventy-Eight Years Old Are Like New

Clothes moths are unknown in the Arctic. Let a pair of white woolen mitts, hanging in the office of O. S. Finnie, at Ottawa, testify. Mr. Finnie is director of the North West Territories and Yukon Department of the Interior.

They were knitted—these mittens—in England, 80 or 90 years ago. A bundle of them was purchased by the outfitters of Captain Sir Leopold McClintock, commander of one of the ships that went north, in search of Sir John Franklin.

They were fastened up in a cask and cached on Deady Island, in 1852, exactly 78 years ago.

Last spring, Inspector Joy came upon the mittens, and he used them. They are back in civilization, and look like new.

Sick Animals

Welcome Minard's. It is an ideal first aid about the stable. Get a bottle today.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Western Representatives:
HUNTER-MARTIN & CO., REGINA, SASK.

Expect National Livestock Policy Recently Formulated Will Greatly Aid Industry

Involving the appointment of a committee of three, and federal appropriation of \$1,000,000, a national livestock policy has been formulated by the Canadian livestock co-operative organizations, following the recent all-Canada agricultural conference in Ottawa. It was announced by W. D. Mackay, president of the Canadian Livestock Co-Operative.

It is proposed that the committee of three, comprising a representative of the livestock co-operatives, a representative of the federal department of agriculture and a third to be chosen by these two, have the direction of the national policy, which will involve the construction of two demonstration abattoirs, one in eastern Canada and one in the west.

Location of the western plant has not been decided yet, but there is some possibility it may be built in Regina.

The purpose of the policy is to enable producers to secure information in regard to processing, distribution and marketing, as well as production, so that not only will costs of processing be determined, but also grades may be established on a proper basis for both live animals and meat products. "It is the intention," said Mr. Mackay "to cover all phases of the industry from producer to consumer. There are serious defects in production as well as in processing, distribution and marketing."

The policy outlined is the aftermath of the Ottawa conference in March between representatives of the federal and provincial departments of agriculture and of the livestock co-operatives, when a resolution was adopted requesting the federal department, in association with the co-operatives, "to investigate the reasons for the fluctuation in prices of livestock and livestock products, and endeavor to construct a policy which will stabilize prices to profitable levels, particularly with reference to selling of such products on the export markets."

"The proposal," said Mr. Mackay, "does not contemplate any interference with the established packing industry, but the proposed two demonstration abattoirs will be in the nature of research laboratories, designed to establish the necessary spread in prices between the live animal and the finished products, to determine the possibilities of extending the range of variety of products and to ascertain the extent to which diseased animals can be a charge on livestock production."

"These demonstration abattoirs would be an invaluable aid to the industry in solving problems which will doubtless arise as the industry develops. Rightly or wrongly, the majority of producers today believe they are paying unnecessary charges for a huge surplus of equipment, for excessive costs on equipment not being used to capacity and for out-of-date equipment."

"These are some of the reasons why the livestock industry is languishing and why it is impossible to persuade the producer to increase production to the point where it would be possible to meet the requirements of the British market for a continuous supply of uniform quality products."

"While livestock production has made progress in the past 15 years, it has made less progress than any

other industry in the Dominion. In fact, Canada's exports of livestock and livestock products are rapidly approaching the vanishing point whereas this should be one of our big sources of national revenue.

Canadian cattle exports have dropped from 204,900 head in 1925 to 162,000 last year, and live hogs in the same period from 58,000 to 3,900 head. Exports of hog products have dwindled from 150,000,000 pounds in 1925, to 39,000,000 pounds in 1929. For the same period total marketings of Canadian cattle have declined 168,000 head, and hogs, 160,000.

"The seriousness of the trend can readily be grasped when the importance of the livestock industry to agriculture and the importance of agriculture to the national welfare is considered. Because of the relationship between agriculture and industry the problem is of as great interest to the city man as the farm resident. And it affects the welfare of eastern Canada just as it does that of the west."

"Monies have been expended for research and laboratory work in connection with other commodities, and it is just as imperative that similar assistance be given to the livestock industry, at present a declining national asset. If steps are not taken to put it on a parity with other industries, all industry will suffer."

"Under present conditions the producer is afraid to increase his production. It is essential he receive some assurance that his efforts will not be met by greater losses."

Predicts Speedier Motor Cars

Will Come With Better Highways, Says Sir Henry Segrave

Automotive racing cars which will travel so fast that the human eye will be unable to record their passage are mechanical eventualities—speedsters on land which will outrun the swiftest aircraft that have been designed for cruising among the clouds.

That, at least, is the prediction of Sir Henry Segrave, owner and driver of the world's fastest automobile, the spectacular "Golden Arrow" which was powered to attain a maximum speed of four miles a minute and which was timed at Daytona Beach at the unparalleled velocity of 231 miles an hour.

Sir Henry Segrave maintains, says "The Scientific American," that with the eventual building of super highways in the United States, and with future perfection of the ordinary motor car, American motorists will travel at speeds from 100 to 150 miles an hour during their cross country tours with as great safety as they would journey at forty-five miles an hour. He says that at present there are ten makes of cars built in England which can do 100 miles an hour or better on present tracks and the finest roadways.

The Great Northern Plains

Area in Dominion Furnishes Pasture For Musk Ox Caribou

There is an area in Northern Canada lying between the timber-line and the tide-water of the Arctic Ocean and Hudson Bay, which includes about 500,000 square miles or nearly one-seventh of the area of the whole Dominion. Although not producing trees this area is not barren but provides pasture, in places luxuriant, for the migratory musk ox and caribou. Several exploratory expeditions have been made through portions of this area during recent years by surveyors of the Topographical Survey, Department of the Interior.

Ice From Desert Sands

Torrid desert sands may furnish the ice of the future, and it will be twice as cold as any ice made from water. The commercial possibilities of "dry ice" from carbon-dioxide lying beneath the arid stretches of western Colorado and eastern Utah are being stressed by the United States Department of the Interior.

Launches "Helene"

Miss Nesta Gillies, daughter of Captain James Gillies, C.B.E., general manager of the Canadian Pacific Steamships, Ltd., who launched the "Princess Helene" from the yards of Messrs. Wm. Denny & Brothers, Ltd., Dumbarton, on April 29th.

The "Princess Helene" will have a tonnage of about 4,000 and her port of registry will be Saint John, N.B. She is intended for the Canadian Pacific Bay of Fundy service.

Who Controls Canada's Wealth

Estimates Show Largest Per Cent. Of Securities Held By Canadians All this talk about Wall Street owing Canada does not stand up before facts.

The wealth of the Dominion is between \$28,000,000,000 and \$30,000,000,000 according to the latest figures of the Dominion Bureau of Statistics. Of this sum outside capital makes up \$5,804,000,000, or not more than one-fifth of the whole. And this one-fifth is by no means all in the hands of American neighbors. More than \$2,000,000,000 of the amount belongs to the British Isles, the United States share being \$3,470,000,000.

Further, the bureau estimates that from 55 to 65 per cent. of the securities of all enterprises on Canadian soil are in Canadian hands, and that, in addition, Canadians have invested abroad the sum of \$1,745,815,000, of which nearly \$1,000,000,000 went to the United States.

In other words, Canada's 10,000,000 people have invested outside of their own country something like 30 per cent. of the amount that represents outside investments in Canada.

Ship's Cook (to new helper) — "Ever been on a ship before?"

Helper — "Sure. I was a gunner in the Navy."

Cook — "Well, start right in and shell the peas."

Development Of Extensive Fish Industry In Hudson And James Bays Planned

Farming By Machinery

Mechanical Aids Have Followed Each Other In Quick Succession

Early in the day, on farms large and small, the inventor and manufacturer largely repeated their triumphs in factories and mills. Their reaper had started a revolution on the land before the Civil War. But that crude device, which merely cut the grain and left it unbound in piles, was superseded by the automatic self-binder, and later, in the Far West, by a machine that cut, threshed and bagged wheat ready for the market all in a single operation.

In 1870 the chilled steel plow, light and durable, was available at a low cost to farmers long accustomed to the heavy, back-breaking implement of ancient memories. Swift in succession came mechanical corn planters and wheel drills that drove from the fields the men who dropped or sowed grain by hand. Corn huskers, shellers, riding plows, hay loaders, potato diggers, tractors, gas engines and other prime inventions made a change in the cultivation of the soil scarcely less profound than that wrought by the spinning jenny, the loom, and the blast furnace in the methods of manufacture.

The man or woman with a hoe, bowed by the weight of centuries, now mounted a tractor and drove a furrow with the knuck of a motorist. If, unlike the industrial operative, the farmer worked alone in the open country, still the automobile, rural postal service, telephone, and radio now gave him quick communication with the market, bank and grange.

Idea Might Be Useful

Ontario Towns Has Use For Old Motor Cars

Never again will wornout motor cars be discarded to the scrap heap in this locality. A new use has been found for them.

More than 150 motor relies were taken to Gressy some time ago and placed along the shore of Lake Ontario and filled with stone. The water in the lake is high at present and formerly the seas continually swept over the road, practically ruining it for traffic.

The automobile breaker, however, has proved successful and the road is now in first-class condition.

FORCED DOWN BY FOG

A privately chartered aeroplane bound from Montreal to New York, with Rev. Avila Papineau, rector of St. Catherine Church, and Charles Moquin and Leonard Lehan, Montreal business men, as passengers, became lost in the fog, and had to make a forced landing on the estate of Dr. C. H. Dunn, at Kakonah, N.Y. It was reported that the machine lost a wheel while making the landing. George Pigeon, a former aviator, was piloting the machine. The photograph here shows the aeroplane after the landing.

Prospects of developing an extensive fishing industry in Hudson Bay and James Bay are scented by the Dominion Government. Some time this year the Department of Fisheries plans to send an expedition northward to find out just what fish, if any, there are in the great northern inland sea.

The completion of the Hudson Bay Railway to Churchill and the announcement of plans to push the Temiskaming and Northern Ontario Railway northward to James Bay make an investigation of the fish resources of the area important. Hitherto there has been no means of getting fish out and consequently no attempt at commercial fishing. Rail communications, however, will bring the Bay close to the great inland fish markets of the continent and provide for prompt delivery of fish to southern Ontario, the prairie provinces and the central states.

The expedition will be composed of practical fishermen accompanied by a scientist. They will sail northward in a regular fishing ship, possibly a trawler or perhaps a schooner. Owing to the tremendous area of water to be investigated it is felt the expedition will require at least two years to complete its work.

The fish explorers, as they may be called, will sail about the bay dropping anchor here and there and catching whatever fish are available. They will observe and note the varieties of fish and the quantities in which they are found, also the condition under which fishing operations would have to be carried on and the type of boats required for successful commercial operations.

Although men have sailed over and lived around the bay for centuries there is no accurate knowledge of the fish to be found there. It is known that fish are plentiful in rivers emptying into the bay but no one knows whether they exist in the bay itself. The only fishing ever done in the area has been on the small scale designated by immediate local consumption. Consequently the only catches have been made in the rivers and in the bay about the mouths of rivers and in the neighborhood of settlements.

The department feels it is best to make its investigation early before attempts are made at commercial fishing. In this way they may be able to avoid loss to private individuals. But they will also determine in advance the regulations which should apply to any commercial fishing which might develop there and will avoid the difficulty of imposing regulations on fishermen who have already established their business.

To Take Canadian Census

Will Give Employment To 1500 Persons Next Year

Preparations are under-way for the decennial census of Canada to be taken in 1931, giving employment to 15,000 persons. The whole country will be covered by information seekers, getting statistics as to population, births, deaths, migrations, sex, nationality, age and operations. Production in all its forms, including mines, transportation, marketing, and finance will be looked into. Altogether there are 36 main headings in census classification and 58 sub-section headings.

"You are short-sighted and don't wear glasses." "I do, but I hate them so that I only wear them when I am asleep." — Pages Galea, Yverdon.

"You haven't said why you want a divorce?" "Because I have a husband." — Gauris Meschino, Milan.

Watch for the SMP label of quality on all Enameled Kitchen Utensils you buy.

WORLD HAPPENINGS BRIEFLY TOLD

There are 27 aeroplanes in use by the Canadian Government at present. Canada has spent \$63,886 in sending delegations to the International Labor Convention at Geneva, since 1925.

Earl Brydges, champion dog team driver of the world, is to become a resident of Ontario and Quebec. He is taking with him the team which sped to the world's title at The Pas dog derby this winter.

Navigation on the Great Lakes officially opened April 28, with the arrival of the "Hamonie," and "Noronic," at Port Arthur, with 3,000 tons of package freight for Western Canada points.

For the eleven months ending February 28, 1930, a total of 406,969 radio licenses had been issued in Canada. Ontario with 201,941 receiving sets leads Canada. Saskatchewan has 31,266; Alberta, 20,574 and British Columbia 34,426.

The vaults of the Bank of France now hold more than one-sixth of the gold reserves of the world. France stands second in this respect only to the United States. Her present reserves exceed those of Germany, Italy and Britain combined.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy writes: "It is the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere."

Important Letters Now In Dominion Archives

Canada Has Most Of Letters Signed By Sir John A. MacDonald

The first public document signed by Sir John A. MacDonald has been added to the voluminous collection of his papers gathered together by Dr. A. G. Doughty, curator of the Dominion archives. It is an affidavit signed by Sir John on October 6, 1834, upon his appointment, as a poll clerk in the Upper Canada election in Prince Edward county. He was 19 years old at the time.

With the receipt of this letter, the Dominion archives now houses most of the important letters written by the first premier of Canada. Among the papers is the first draft of the British North America Act, in Sir John's handwriting.

Physicians have stated, that a cough or a cold that lasts more than three weeks merits a general physical examination.

Canadian Pacific Offer Attractive Summer Tours

Is your vacation anytime between May 15th and September 30th? If so, why not take one of two very interesting tours—at reduced rates—offered by the Canadian Pacific? Consider first the Eastern Tour and what it has to offer. It will enable the tourist to visit Ontario—with its famous lake resorts, Old French Canada—with its picturesque "habitations," and the Maritime Provinces—with the interesting fisherfolk and their equally-interesting craft. The tourist may travel to these places entirely by rail, or may choose to travel some of the way over the cool waters of the Great Lakes on a great white Canadian Pacific Great Lakes Steamship.

Various Ontario resorts at the lakeside provide fishing and bathing and, in fact, all summer sports. Niagara Falls, the beauty of which attracts so many people from all parts of the world, is only one of the many other salient features of this tour. One may, on this eastern excursion, visit Old French Canada. There the traveller will see the many picturesque Catholic shrines that are scattered along the shady Quebec country roads—the "habitations" rolling past on their quaint wagons drawn by oxen. In Montreal the visitor will be amazed by contrasts. There, drawn up at the dock, is the latest ocean liner—a product of the new world, whilst—almost under its very shadow is the Bonsecours Market, where the French "habitations" sell their farm-produce just as do their relations in the old land. Then again—the excursionist may resolve to pass on as far as the Maritime—as far as St. Andrews where golfers and artists meet. In proportion to its size, there are more magnificent homes and more prominent visitors than in any other town in Canada.

There is Digby, Nova Scotia—the fishing centre; Parrsboro—the Port of Nova Scotia; Yarmouth and Weymouth—two more shipping centres; and Old Orchard, Maine—a famous bathing resort.

PACIFIC COAST

Another fascinating excursion is that to the Pacific Coast. This allows of opportunities for the excursionist to see the majestic scenery associated with the Canadian Rockies, to see beautiful Lake Louise, to enjoy a round of golf over the famous course at Banff Springs, or to stay a week or so at the Emerald Lake Chalet—enjoying the fresh mountain air and the scenery that is offered. One of the chief features of this tour in the nature of a side-trip is a twenty-four hour motor detour which takes the visitor by way of the famous Banff-Lake Louise region, along the Kicking Horse Pass to the Yoho Valley, perhaps the most glorious and varied motor trip that has ever been offered on this continent. Then on by train through picturesque British Columbia with its numerous lakes to Vancouver.

After Vancouver—Victoria, the capital of the province, renowned for its scenic resemblance to the Old Country. At this city, the famous Cowfold Golf Course, the Dominion Astronomical Observatory—with its second largest telescope in the world, and Butchart's sunken garden, are the chief attractions. At Victoria two famous excursions are offered—a ten day cruise to Alaska and a seven day cruise of the West Coast of Vancouver Island. To those whose vacation period is short, the famous Canadian Pacific "Trans-Canada Limited" will prove valuable for speedy travel. It is equipped with luxuriant all-steel sleeping cars, solarium lounge, women's lounge and bath, men's bath, smoking room, buffet with soda fountain, observation lounge and a valet service. It is finer and faster than ever, and the equipment of each train entails an investment of over a million dollars.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexion of exquisite charm. Adds a subtle finish to the daintiest woman. Invaluable for softening the hands and making them flawlessly white. Cool and refreshing. Daintily fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Canada Large Exporter Of Gypsum Products

Has Developed Trade With Thirty-Five Other Nations

A European trade conference dealing solely with Canadian gypsum products is scheduled to open in London, on April 30th, says R. E. Haire, head of Gypsum, Lime and Alabaster, Canada, Limited, who points out that, "in three years' time trade in Canadian-made gypsum products has developed with 35 other nations and has increased so rapidly that the company has now become the largest exporter of the materials in the world."

New York University Given Valuable Papers

Early English Legal Documents Date Back 700 Years

A collection of more than 400 Early English legal documents, some of them dating back 700 years, has been presented to New York University by Judge Moses H. Grossman in the name of Frederick Brown, real estate operator and philanthropist.

Among the collection is a 12-foot parchment "pipe-roll," made of a series of skins sewed together and originally kept in a metal tube. It records that a sheriff, Richard Pyle of Southampton County, collected Crown revenues in 1638 "from the Jews for protection from being defrauded from the knights," and "from the knights for license to defraud the Jews."

NERVES WERE BAD Could Not Sleep Tired All Day Long

Miss Florence Coulter, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long."

"A neighbor came in to see me, one morning, and advised me to take MILBURN'S HEART AND NERVE PILLS."

"The first box did me good and after the sixth box I was able to go back to my work."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

To carry away static electricity from oil chains, iron chains that dangle to the ground are fastened to the frames.

SUNDAY SCHOOL LESSON

MAY 11

JESUS ACCLAIMED AS KING

Golden Text: "Hosanna to the Son of David; Blessed is He that cometh in the name of the Lord; Hosanna in the highest."—Matthew 21:9. Lesson: Matthew 20:29 to 21:46. Devotional Reading: Hebrews 1:8-12.

Explanations and Comments

Preparations For the Triumphal Entry, 21:1-14.—When Jesus and the crowd with him approached Bethphage, on the Mount of Olives, not far from Jerusalem, he sent two disciples on ahead to make preparations for entering the city, bidding them find in the village an ass tied, and a colt with her, which they were to loose and bring to him. If the owner objected they were merely to say "The Lord hath need of them," and he would send them. The horse was the symbol of war; the ass the fitting symbol of the Prince of Peace. The Triumphal Entry, 21:7-11.—The disciples followed instructions and brought the ass. They put their loose outer robes upon it for Jesus to alight safely in a tree. They spread their garments in the way or cut branches from the trees and spread them down for Jesus to tread over. "Some have ridiculed the idea of spreading branches on the road as offering incredible obstructions and dangers; and yet the orthodox custom in Russia, in a funeral procession, is to spread the route with branches of fir."—W. A. Grist. Because of John 12:13, it has been generally supposed that the branches were palm branches, although John only mentions the fact that the people came out from Jerusalem to meet Jesus bearing branches of palm. We know from Revelation 7:9 that palms were carried as symbols of victory and rejoicing.

John also says that many people, excited by the news of the raising of Lazarus (which he records), hurried from Jerusalem to meet and do honor to Jesus, while following with Jesus was this other multitude of Galileans on their way to Jerusalem to keep the Passover. Both crowds united in crying, "Hosanna to the Son of David."

Dairy Production Higher

According to L. A. Gibson, provincial dairy commissioner, the winter dairy production in the province of Manitoba for the first two months of 1930 has been the highest in the history of the province, an increase for January of 0.9 per cent. and February 6.4 per cent. over 1929.

Heal the Sprain with Minard's.

Germany's New Idea

A novel experiment in prison life in which "high grade" prisoners will be given two weeks' vacation a year, permitted to accept work from outside employers and given a share in the management of the prison, is about to be tried out in Germany.

Children's Croupy Colds Quickly Relieved

Take a saucer or pitcher of water; place it on a spirit stove or lamp. Add half a teaspoonful of Catarrhose to a pint of water which is brought to a boil. Let the steam from the kettle fill the room so that medicated air is breathed in by the child. The distressing cough is relieved. The inflammation is reduced. Good results are quickly noticeable from using Catarrhose in this manner. Even for small infants this treatment is ideal. Every good druggist sells Catarrhose in 50c. bottles.

Parachute Opens Itself

Was Pronounced Success In Test-At Curtiss Field Recently

An automatic parachute which opens of its own accord after a jump, was demonstrated successfully at Curtiss Field by John Rungger, a professional parachutist. Rungger, his hands tied behind him, jumped from a plane at 2,000 feet. He landed safely in a tree.

So pleased was Rungger with the chute that he said he would jump from 20,000 feet with one. It was invented by John Ruby.

DO YOU SUFFER FROM CONSTIPATION?

Countless remedies are advertised for constipation. Many relieve for the moment but they are habit forming and may be dangerous. Others contain calomel and dangerous mineral drugs, which remain in the system for days in the joints and cause aches and pains. Some are harsh purgatives which cramp and gripe and leave a depressed after effect.

Avoid lubricating oils which only grease the intestines and encourage nature's machinery to become lazy. A purely vegetable laxative such as Carter's Little Liver Pills, gently touches the liver, bile starts to flow, the bowels move lightly, the intestines are thoroughly cleaned and constipation poisons pass away. The stomach, liver and bowels are now active and the system enjoys a real tonic effect. All druggists 25c and 75c red packs.

One of the attractions at Cannes, France, is a woman who lives in a ground glass in a glass cage.

It Testifies For Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

The world produced 1,323 million barrels of crude oil in 1928.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the health-giving Ultra-Violet Ray, which does not penetrate ordinary glass.

allows the full sunlight to enter, including the health-giving Ultra-Violet Ray, which does not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

PRIME MINISTER PROPOSES NEW FISHERIES POST

Ottawa, Ont.—Prime Minister Mackenzie King has given notice of a motion providing a salary for a new Minister of Fisheries. Another motion standing in the name of the Prime Minister on the order paper declares that it is expedient that there shall be a new Department of Fisheries. The salary of the Minister of Fisheries is set at \$10,000, which is identical with that of the other Cabinet ministers.

The impression prevailing in political circles is that creation of the new portfolio will give Prince Edward Island representation in the cabinet. Since 1926, that province has been without ministerial representation, but it is recalled that at the time of the formation of his last cabinet, four years ago, the Prime Minister intimated that a minister from Prince Edward Island would be added. It is stated, however, that the government is considering the question whether to give the province representation through the new department of fisheries or through another department by the shuffling of portfolios.

Hon. J. E. Sinclair and R. J. Jenkins, both Liberal members for the dual constituency of Queens, and A. E. MacBain, Liberal member for Prince Albert, are mentioned for Cabinet appointments.

Another name prominently associated with the appointment is that of Dr. Cyrus MacMillan, a professor at McGill University and formerly of Prince Edward Island. Dr. MacMillan was a member of the Atlantic Fisheries Commission.

Creation of a separate department of fisheries with a minister and a deputy presiding at its head, was recommended by the Duncan Royal Commission, which investigated conditions in the Maritime Provinces back in 1925 and 1926. About a year ago, W. A. Harvey was appointed as Deputy Minister of Fisheries to carry on such duties under the Minister of Marine and Fisheries, Hon. J. A. Cardin. Under the proposed legislation, Mr. Cardin will devote his ministerial energies to marine.

Another legislative proposal bearing on fisheries is for the transfer to the new department of fish all used for manufacturing purposes, tempering of steel and the like. This task is now being performed by the Department of Agriculture under The Inspection and Sale Act.

It is contemplated also to increase from five to seven the number of appointments which may be made by the minister of fisheries to the Biological Board of Canada.

The purpose of the change is to give an additional representative to the fisheries industry of both British Columbia and the Maritime Provinces.

Must Take Livestock Industry Seriously

Or Canadian Farmers Will Lose Business, Says Cattle Man

Winnipeg, Man.—Canadian farmers must look to their livestock producing as a serious industry or they will have it taken away from them, declared Col. H. A. Mullins, former member of Parliament for Marquette and one of the best-known cattle men in the Dominion here.

Just as big packing companies in the United States have undertaken to raise their own cattle, Canadian firms will be forced to do the same thing if farmers fail in this respect as they have done heretofore. In Montana, Col. Mullins said, abattoir companies are feeding 52,000 hogs and nearly 3,000 cattle.

May Amend Foods and Drugs Act

Ottawa, Ont.—Hon. J. J. H. King, minister of pensions and national health, introduced a bill to amend the Food and Drugs Act in the House of Commons recently. This provides for analysts who are employed by the provinces or municipalities, and who are not members of the department staff to be designated "Dominion Analysts" while so employed.

W. N. U. 1836

Ramsay MacDonald Has Talk With Australia

Twelve Thousand Miles Bridged By Beam Wireless Service

London, England.—On April 30, in the cabinet room at No. 10 Downing Street the telephone rang promptly at 8.30 in the morning and Prime Minister Ramsay MacDonald, conning some papers in his usual chair at the head of the table, lifted the receiver and said: "Hello, is that you, Scullin?"

Thus was inaugurated the first direct beam wireless telephone service between England and Australia. The Labor Premier of Britain conversed with the Labor Premier of Australia, James Scullin, over a distance of 12,000 miles, and the chat went on for 15 minutes. The two premiers discussed Empire problems. The forthcoming cricket test match between England and Australia in England, and when they were likely to come together.

Though oceans and continents lay between them, each could hear the other distinctly. Others in the cabinet room had the benefit of hearing the conversation through earphones. The whole conversation was clear throughout. Premier Scullin's voice travelling through the air from the other side of the world, was only a trifle fainter to the listeners here than was Premier MacDonald's.

"I hope the day is not very far off when we shall have the physical distance between us by air passage too," Premier MacDonald said.

Manufacturing Is Increasing On Prairies

All Three Provinces Are Sharing In Rapid Development Of Industry

Winnipeg, Man.—Progress of the manufacturing industry of the prairie provinces during the past year was testified to by C. E. Harvey, of Winnipeg, retiring chairman of the prairie division of the Canadian Manufacturers Association, at the annual meeting here.

Mr. Harvey said many new factories came into production on the prairies last year, the value of products produced in 1929 totaling more than \$340,000,000, and all provinces—Manitoba, Saskatchewan and Alberta—shared in the development.

Saskatchewan, famed as a wheat producing area, can now also lay claim as a manufacturing province of importance, said Mr. Harvey. Last year the manufacturing industries of the prairies distributed a pay-roll of more than \$75,000,000, and the general public are rapidly coming to the realization that factories are a definite value to the community. Industrial workers created a "home market."

Livestock Ranch For North

Company Interested Has Applied To Ottawa For Lease Of Land

Prince Albert, Sask.—Prairie interests planning to expend \$200,000 in establishing a livestock ranch north-east of Big River, have applied for a lease on a third of a township in the vicinity of that town, it was revealed by L. G. Patterson, Dominion lands agent. He stated the area has been inspected by those behind the project and found to be ideal for livestock ranching.

Included in the livestock which it is intended to raise are sheep and Angora goats, Mr. Patterson has been informed. The application for a lease has been forwarded to Ottawa. The names of those behind the scheme have not been divulged.

A Royal President

London, Eng.—The Prince of Wales has consented to become president of the Professional Golfers' Association, succeeding the late Earl of Balfour. The Prince always has taken a great interest in golfing and besides having held the royal and ancient captaincy has been captain at various times of several metropolitan clubs.

Delegates From Canada

Montreal.—A thoroughly representative group of Canadian business men will leave for London, England, May 18, to attend the Federated Chambers of Commerce of the British Empire conference, starting May 26.

DEFENDS MARSHALL FOCH

Raymond Poincaré, former premier of France, has taken up the pen to defend Marshal Foch against the criticism of Clemenceau's "Grandeur and Misery of Victory."

Japan Chooses Vancouver

First Trade Commissioner Arrives To Open Office At Canadian Port

Vancouver, B.C.—Japan has appointed its first trade commissioner to Western Canada in the person of Masao Suma, who has arrived in Vancouver to open an office here from which he will seek to stimulate Japanese trade with Western Canada and the Northwestern States.

"There are busy ports in the American part of my territory," Mr. Suma said, "but the fact that the Japanese government has selected Vancouver as the site of the office indicates the importance that my country attaches to the growing trade with this port."

Japan now has diplomatic, consular and trade representation in Canada. The trade commissioner will work in co-operation with the consular service, Mr. Suma said. The volume of trade between Canada and Japan has increased twentyfold in the past 20 years, the new trade commissioner said.

Last year Canada's imports were \$19,000,000, and exports to Japan were \$43,000,000, making a total volume of trade of \$62,000,000, or twice as much as in 1910.

Britain To Establish Flour Regulations

Minimum Percentage Of Domestic Flour Required For Each Loaf

London, England.—The British Government has definitely decided to establish regulations requiring a minimum percentage of British wheat flour in every loaf, milled in Britain, according to the agricultural correspondent of the "Daily Express" to day. The newspaper adds the minimum will be varying not a fixed figure and that the government's policy will shortly be published in the form of a governmental "white paper."

Good Market In Orient For Apples

British Columbia Growers May Build Up Big Business

Victoria, B.C.—Plans for invading Oriental markets with British Columbia apples are being shaped by the provincial government through the marketing branch of the department of agriculture, following the receipt of advices from Hon. Herbert Marler, Canadian minister to Japan, pointing to the possibilities of this business. A large market awaits the B.C. fruit in Japan and China, Mr. Marler said, and the department is anxious that the fruit industry take advantage of these opportunities.

The impression made by experimental shipments from here to large markets like Hong Kong, has been excellent, Mr. Marler stated, and should enable Canadian growers to sell large quantities there in the future.

The department is also anxious to promote the shipment of canned B.C. fruit and vegetables to the Orient, and Mr. Marler believes that a large business in this line can be built up. The need of extensive advertising to compete with huge American exports is stressed. Officials of the department will confer with the fruit, vegetable and canning industries in an effort to take advantage of these possibilities in a big way.

Italy's Naval Program

Government Planning To Build Twenty-Nine New Warships

Rome, Italy.—The Italian government decided to lay down 29 new warships this year—a total of 42,900 tons, divided into one 10,000-ton cruiser, two 5,100-ton scout cruisers, four 1,200-ton destroyers and 22 submarines totalling 17,740 tons.

Four of the submarines will be of 1,300 tons each, six of 81 tons, and 12 of 610 tons.

The council of ministers decided on the program after a detailed report by Admiral Siriani, who was the Italian naval expert at the London naval conference, and the press hailed the action as bringing "parity in fact."

Manitoba Seeding Nearly Done

Winnipeg, Man.—Seeding of wheat is about 80 to 85 per cent finished in Manitoba and present prospects are favorable for early sowing of the entire grain crop, according to a summary issued recently by the Manitoba department of agriculture. A large number of farmers have all their wheat sown and are proceeding with the planting of their other crops.

Duchess Completes Trip

London, Eng.—The Duchess of Bedford, 64-year-old aviation enthusiast, completed a round trip to Capetown when she landed at Croydon airport April 30.

DISCUSS BONDING OF COMMISSION GRAIN BUYERS

Ottawa.—Methods of protecting farmers from defalcations of commission grain merchants were discussed in the House of Commons Committee on Agriculture. It was pointed out that elevator operators were fully bonded to protect persons who stored grain with them. In the case of commission merchants protection to the same extent was not afforded.

The question was raised during a discussion of the new Grain Act by Hon. H. H. Stevens (Cons. Vancouver Centre), who thought there should be some provision in the act for the bonding of commission merchants.

E. B. Ramsay, chairman of the Board of Grain Commissioners, thought commission men might be put out of business if they were required to put up higher bonds than now.

Doubt as to whether commission merchants served any useful purpose was expressed by E. J. Garland (U.P.A., Bow River). He said the business was dying out, and wondered if the service performed by the men to the trade compensated for the losses sustained through their occasional defalcations.

The commission men were an important factor in competition with elevators, said Mr. Ramsay. Their services acted as a curb on the tendency of elevator companies to increase their charges.

In this case, Mr. Garland said it might be a good thing to raise the bonding requirements. Then those commission men who were able to make a profit from the business could still carry on and the farmers would be protected.

Strict penalties are provided in the new Grain Act for breaches of its provisions respecting commission merchants. A penalty of not more than two years imprisonment or a fine of not more than \$5,000 on indictment is provided for any person who buys, sells or arranges for the weighing, inspection or grading of western grain for reward without a commission merchant's or grain dealer's license.

Some discussion arose about this action, particularly a clause placing the burden of proof of innocence on the accused. Some members thought this was too severe and Mr. Stevens objected on the ground that it conflicted with the general principles of British jurisprudence. The committee has already completed its routine review of the act. Many difficult and contentious sections have been left over and will be taken up at later sittings.

Studying Canadian Railway Methods

Reorganization Of Their System Planned By Soviet Officials

Winnipeg, Man.—Six officials of the Soviet Republic arrived in Winnipeg to study the methods and the facilities of the Canadian National Railways with a view of producing a complete reorganization of railroad practice in Russia.

"Traffic has increased to such an extent in recent years that we find ourselves unable to cope with present needs and consequently we must reconstruct our whole railway system," said D. E. Sultimoff, Vice-Peoples Commissioner for Ways of Communication of the Soviet Republic, who is heading the committee in its investigations. "We are particularly interested in the heavier track, the stronger motive power and the yard facilities, none of which are found in any European country."

Noted Barrister Dead

Ottawa, Ont.—Eugene Lafleur, K. C., one of Canada's most distinguished barristers, died here April 30, from pneumonia. Mr. Lafleur was prominently connected with most of the largest litigations which Canada has had in recent years. He was to have acted as the Dominion's representative on the board of arbitration which is to investigate the "Tales in Alone" dispute with the United States.

This photograph shows Stanley Baldwin (left), former prime minister of Great Britain, smoking while looks like a "Dawes pipe," with the Cambridge coach, watching the Cambridge new trial at Putney, Eng., in preparation for the classic Thames boat race, which was won by the light-blue of Cambridge.

Liberals' Executive Meets.

An important meeting of the executive of the Stony Plain Liberal association was held in the town hall Thursday last. The meeting was presided over by Mr George Bryan, the president, and the principal item of business was the decision to hold a nomination meeting on May 13th, at 2 p.m., in Stony Plain. This will be a closed convention, with 2 delegates from every poll. Primaries will be held Monday next at 8 p.m.

J W McDonald K.C., the new Liberal leader, will address a mass meeting in Moose Hall Tues. May 13, at 8 p.m.

The Camera Prizewinners.

Following are the names of those who received the free Eastman kodaks at Stony Plain Pharmacy. May list—

Irma B Michael
Hazel May Becker
Vera D Peters
Eileen D Sauder
Annie Elsie Wudel
Walter Albert Mayer
Flora May Dickie
Clara B Shinbein
Morris John Sutherland
Lloyd Walter Willie
Clara Kotscherofsky
Amelia Gotselinger
Walter Carl Foerster
Louie Edward Miller
George Arthur Trapp

Some of the applicants were in line at 5 a.m., so eager were they to get a prize. Mr Clarke had made every effort to have as few as possible disappointed.

Basketball League

A first-class game in the basketball league series was played on local grounds last Friday evening between the invincible Walther League's team and Stonies. The play was rather lopsided in the first part, with Stony's one basket to their opponents' 4. In the latter part of the game, however, Stony players put on a big spurt, tying the score at the end. In a five-minute period of overplay, Stonies scored a basket, winning the game by a score of one.

Sunday's games—Boys, Garden Valley 14, Stony 10. Comet 17, W League 13. Girls—Comet 6, W League 3.

Railway Time Table

Going East—Mon., Wed., Fri. at 7:01; every morning at 8:23.
Going West—Sun., Tues., Fri. at 13:29; every midnight at 24:04.

Spruce Grove News

Mrs John Shinbein returned on Saturday from her trip to the Old Country.

Miss Emilia Miller, of the Royal Bank staff, Edmonton, spent Arbor Day here, with her brother Mr J D Miller.

Mr Robt Beuerlein was a Sunday visitor in Stony Plain with Mr and Mrs Wm Kelly.

Mr Wm Miller, whose wife Elizabeth A Miller, passed away last week, is now on his way home from the Old Country, where he had gone for a visit.

Mr Chris Breithaupt is now sporting a 1930 Chevrolet.

Mr Fred Walbaum, the C. N. Colonisation agent, paid an official visit, on Saturday, to some of the immigrants recently located here.

The Grove was well represented at the boxing tournament in Stony, Friday night.

The councillors of Spruce Grove M. D. held a lengthy meeting in Municipal hall on Monday.

The gravel gang, which had been working around here for several weeks, are moving up to Stony this week. Jack Nichols will now have a good rest.

President C McKinly, of the Spruce Grove Local, has called a meeting for Saturday evening next, to elect delegates to the United Farmers nominating convention, to be held in Stony Plain next week.

Mr Julius Frank hired a good-sized bunch of brush-cutters in Edmonton and has them located on the quarter up north he recently purchased. There is said to be fit ten in the party.

Farmers are complaining that the showers, which seem to be so abundant to the west do not reach here. A good four hour rain wouldn't come amiss just now.

Stony's Junior baseballers paid the Grove a visit Sunday afternoon, and after some good play, the visitors met defeat to the tune of 13 runs to 6. Grove's battery—Karl Loeblich p, C Brox c. W Box, umpire. The feature of the game was the base stealing and catching of several high flies by Mr Brox No. 4.

In an interview with the proprietor of the local meat emporium, your correspondent was informed that it was not at "Scotty's" shop where the young matron walked in with an infant in her arms and asked "to have Emeline weighed, after the garlic rings"

Getting Ready for Shriners

Between 30,000 and 40,000 members of the Ancient Arabic Order of Nobles of the Mystic Shrine will meet in Toronto next June under the leadership of Estee A. Fletcher (inset), incoming Imperial Potentate of the Order. Hotels of the city, including the Royal York with its 1154 rooms will be insufficient to meet the demand, and the Canadian Pacific Railway is building a city of sleeping cars to accommodate some 8,000 of the Shriners. "Fes City", as it will be called, will cover 21 acres of land and construction data given out show the tremendous scope of the labor. There will be required 115,000 feet board measure in 30 sets of switch ties weighing 210 tons; 12,900 track ties weighing 800 tons; 30 switches weighing 86 tons; 11½ miles of 85-lb. rail weighing 760 tons; 35,000 tie plates weighing 150 tons; 60 tons of rail fastenings; 30 tons of track spikes; 5 tons of track bolts; 18,000 cubic yards of ballasting for tracks; and 9,000 cubic yards of material for 3½ miles of platform with a breadth of 14 feet. The city will be fitted with modern conveniences and a building 220 by 20 feet wide will accommodate 100 cold and hot showers. Lighting will require 75,000 watts, enough to supply 14 miles of city residential street lighting power. This electrical work will call for 35 miles of wire strung on 200 poles. Photo shows site of Fes City.

Stony Plain and District.

Mr and Mrs Otto Oppertshauser motored down from Rochefort on Sunday.

Mr Bert Becker left Saturday for a visit with friends at Scotford.

Mrs James Christie returned Tuesday from a visit with friends in Coquit cities.

Alec Pilzer, one of Stony's former barbers, is in town this week, having motored from Saskatoon.

Messrs Sam and William Gabel made a motor trip to Marlboro, where they have secured positions.

The Chas Ries mansion on First street east, recently purchased by Mr R Breitkreutz, is now being fitted up as a residence, and will shortly be occupied by the owner.

Select bacon hogs were bid 12.35 at Edmonton Stockyards on Tuesday.

Walther League Notes

The regular monthly meeting was held Wed. April 30, at St. Matthew schoolhouse No. 2. Three newly confirmed Jads joined the League, viz: J Beiderwieden, Otto Wudel Sr, Hy Schulz.

It was decided to have a Walther League Zone Rally Thurs. May 29. A committee was appointed, and a good time is expected on that day.

As Miss Elizabeth Hennig has left the district, she sent in her resignation. This was accepted and her name placed on the honorary membership list, as she has always been a faithful member.

CHAPTER X.—Continued.

Long after the dust raised by Jim's car had vanished, the old lady sat watching the road at the point where he and Charmian had turned to wave.

"Well," she sighed, "it kind of wish I knew how I'll all end. I can't help being fond of Jimmy. He's a good boy, and he'll make some woman a splendid husband—that is, if she's not too fantastical in her way of thinking. Sometimes I believe that all there is the matter with him is just being tied too close to Wickfield. There he was, all ready to go to Harvard along with Billy Knowles, and that fool of a Sarah Bennett took on so about his leaving her that he gave it up and went into the bank instead. What Jim needs is a fresh outlook, but dark knows when he'll get it unless his mother should be removed by a merciful Providence, and she's uncommon healthy."

At this point Grandma's thoughts were interrupted by Lizzie Baker's Persian cat, which, being vigorously chased by the Merry's Gyp, took refuge in a horse chestnut tree across the way.

"No need of you standing there glaring at her, Gyp," admonished Grandma. "The good Lord knew what he was about when he gave pussy her claws. That's it, you dig up a bone and go along home peaceable, there's a good dog. I expect that cat'll die of heart failure some day."

Grandma nodded for a moment, and when her eyes opened her thoughts had returned to Charmian, Jim Bennett, and their problems.

"If Jimmy could only get so's he'd see things the way she does—poetry, and sunrises, and small-paneled windows in old houses," she mused, "it would be all right. . . . Now that young doctor, he understands without explaining. . . . If Charmian let the biscuits burn while she watched a sunset (though come to think of it

she never did do such a thing), why he'd just laugh about it. He's good-natured, and not too fussy about what he eats. I've no doubt he'd make her a more suitable husband than Jimmy Bennett would. . . . He's more her sort. . . . and yet—Good land alive!" she broke off suddenly, "here comes Lizzie Baker on the run! I wonder is the Town Hall burning. I haven't seen her run for fifteen years!"

CHAPTER XI.

"What's happened?" asked Grandma, as her old friend puffed into the room and sank down breathless on the nearest chair. "You shouldn't run at your age, Lizzie, heavy as you are. Have you had bad news?"

Miss Lizzie rocked violently for a moment, while she wiped her streaming face with a corner of her apron. "I don't seem to have a handkerchief," she gasped. "Maybe I dropped it on the way."

"This seems to be your day for dropping things," smiled Grandma. "I saw your petticoat come off less'n an hour ago."

"I hope to goodness no one else saw it," replied Miss Lizzie. "Since I got so fleshy my petticoats all need new bands, and I ain't had time to fix 'em. I had a piece of string run through that buttonhole, and it went and busted on me. I was thankful I hadn't got as far as the meat market where I was going, or 'twould have been all over town by now. Well, Grandma, I've got some news—more news than Wickfield's seed since Noah boarded the Ark: Edgar Purdie is suing Luella Moore, over to South Wickfield, for breach of promise! He's got evidence that he gave her a costly present, and he won't return it after refusal to be his wife! Now what do you think of that?"

"I think Luella's got more sense than I gave her credit for," responded Grandma. "A woman that's smart enough to get any sort of present out of Edgar Purdie, deserves to keep it. Did you hear what 'twas he gave her, Lizzie?"

Grandma was so absorbed that she didn't notice a nest-dog-right across the street.

"It was beads," replied Miss Lizzie promptly. "A long string o' fancy yellow beads that cost the deacon a week's pay or more. Oriental, he called 'em; though Sarah Bennett, who see 'em with her own eyes, says they don't look one mite better than what you can get at the five-and-ten cent store up in Portland. Seems the deacon carried 'em with him when he asked her, and like a fool he gave 'em to her first. Guess he thought they'd sort of pave the way for intentions; and accordin' to him she seemed real pleased—said yellow was her favorite color, and let him fasten 'em around her neck himself. So—What you laughin' at, Grandma?" broke off Miss Lizzie, as the old lady suddenly gave way to mirth.

"I was only thinking how silly Edgar Purdie must have looked when he fastened those beads around Luella's neck. Go on, Lizzie. Did he ask her?"

"I presume he did, it bein' what you might call the proper moment; but accordin' to him she sort of put him off. And here's where the trouble commences—trouble for Luella, I mean. She let him kiss her! Of course he went off thinkin' it was good as settled; but when he drove clear to South Wickfield next evenin' for a little love makin' after the children was in bed, she'd changed her mind! They had words, and he asked for the beads back and she wouldn't give 'em up—said he'd made her a present of 'em, and so fur's she knew there wasn't no string tied to it. He came away madder'n a wet hen, and vowed to get the law on her. And next mornin' he put the case in Lawyer Garfield's hands. He's suin' for two thousand dollars and possession of the beads. They say Gann Garfield tried to calm him down, and means to settle it out o' court if Luella's reasonable. Now did you ever hear the best of that?"

"No," replied Grandma soberly, "I never did. But what'll Ed Purdie do with those beads if he gets 'em back? I'd like to ask! He can't wear 'em himself, Lizzie, and they wouldn't be any special use in a missionary barrel, which every one in Wickfield knows is the only charity he ever gives to, and that only because he can get rid of his wornout clothes and credit for being charitable at the same time."

"I dunno but what a string o'

HEADACHES

Needless pains like headaches are quickly relieved by Aspirin tablets as millions of people know. And no matter how suddenly a headache may come upon you, you can always be prepared. Carry the pocket tin of Aspirin tablets with you. Keep the larger size at home. Read the proven directions for pain, headaches, neuralgia, etc.

beads would be more use to the heathen than that old suit hat the deacon found up attic and donated. Last time we packed a barrel," answered Miss Lizzie. "It took up a powerful lot o' room, though I put a cucked butter dish inside it, and some woolen stockings. Seaves are partial to beads, so I've always heard, so like as not the heathen are, too; and the beads would cover a little of their nakedness, which a hat wouldn't."

Grandma's lips twitched with amusement as she replied: "Somehow, Lizzie, I don't think Ed Purdie is counting on giving those beads to the heathen. Luella Moore isn't the only pebble on the beach, as they used to say, and if she won't have him, he's likely to look further. Maybe he'll ask you."

In her indignation Miss Lizzie tried to rise, but as she was what they call "steady" in Wickfield, and the chair was a small rocker with arms, which showed a tendency to rise with her, she sank back helplessly and said: "I'm ashamed of you, Grandma Davies! Why, I wouldn't take Ed Purdie, not if he was covered entirely with beads like the bag that city woman carried to the strawberry festival!"

"There! there!" soothed the old lady. "I didn't mean to get you all stirred up. If he did ask you, Lizzie, it would be the only sensible thing he's done since he asked his first."

"Well," sighed the caller, relenting enough to smile at this tribute, "I dunno but what you're right, though so fur's I know, no man has ever agreed with you. Preps it's just as well, I've always thought a proposal would be a terrible embarrassing thing to live through."

Grandma's eyes twinkled.

"So it might be, Lizzie, under certain circumstances," she admitted. "You got to go this quick!" as Miss Lizzie made another effort to leave the chair. "If Charmian was only home I'd ask you to stay to dinner; but I guess we won't have much but a pick-up. She's gone over to South Wickfield with Jim Bennett to collect a mortgage or something."

"I seen 'em start." With a firm wrench Miss Lizzie extricated herself, and arose. "I'm glad that Jim has come to his senses and dropped that Darling girl. He ain't taken her out but once since the strawberry festival, and then his mother invited her to supper and he had to bear her home. And she leaves town the last o' the week. I declare, Grandma, it'll be a load off my mind, havin' her go. That green hat is a blot on the landscape, and when I see that young doctor of yours walkin' home with it after mail time last night, I decided 'twas time to do something about it, or my name's not Lizzie A. Baker."

"Did he walk clear to the house with her?" questioned Grandma eagerly.

"That he did! And lallygagged around the gate for fifteen minutes. Mrs. Merry says she's a vampire, whatever that is—nothin' respectable, I'll be bound. I meant to kick it up in the dictionary, but I clean forgot. Dear me su! I wish Ed Purdie would ask her!"

"My stars!" breathed Grandma, awed before this inspiration. "I wonder he hasn't thought of it himself. Lizzie, there's no fool like an old fool; and those yellow beads would have been real becoming to that Darling girl. Thanks for bringin' me the news, my dear; but don't you run so fast again or it's likely to be a matter of life and death — to you."

(To Be Continued.)

Made Long Journey

Torn Banded In Labrador Was Seen In Southern Africa

A common tern, member of the gull family, was banded in northern Labrador by Oliver H. Austin, Jr., in July, 1928. Fourteen months later it was seen and examined at the southern tip of Africa on the Indian Ocean, 9,000 miles away, which is thought to set a record.

The tern, or sea swallow, is usually smaller than the gull. Its bill is more slender, its feet not so strong, and its flight more graceful and dashing. The common tern is pure white with a cap and mouth of bluish gray and is sometimes hunted for its feathers. The all-white species live on Pacific islands; those with darker coats are widespread.

KEEPING BABY LOVELY AND WELL

Some babies thrive from the hour of their birth while others make little progress as to be the cause of much anxiety. As a rule it is the digestion that is at fault with these backward ones and they start to go ahead directly Baby's Own Tablets are made the corrective of their stomach and bowel troubles.

Baby's Own Tablets are specially designed for the use of babies and little children. They are absolutely safe and the mother can feel perfectly secure in giving them to even the most delicate child. They are a mild but thorough laxative which banish constipation and indigestion; break up colds and simple fevers and allay the pains which accompany the cutting of teeth. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Interested In Grain Show

The commissioner of agriculture of the state of Montana writes that there is much interest in the World's Grain Show in that state. The officials are encouraging growers to enter the contest most wholeheartedly and to begin the preparation of exhibits this season.

Minaud's Checks Falling Hair.

A Calgary aviator flew his plane both ways over the highest peaks of the Rockies. The more these things happen the more veneration we have for the men who went through and over the Rockies with dog-team and pack-sack.

If Skinny, Beware, Says Doctor. Gain Quick

New Ironized Yeast Adds 5 to 15 Pounds In 3 Weeks. New Health, Strong Nerves—Or No Cost

"Skinny folks subject to many grave diseases," says an eminent physician. When sick they lack reserve strength and many die. Don't run risk of dangerous diseases from skinniness. New Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ends nervousness, constipation, indigestion over night. Clears skin like magic. New pep first day.

Two great tonics in one. Weight-building Malt Yeast, and strengthening Iron. Far stronger than immediate yeast. Results in half time. Get new health and weight quickly. Get pleasant tablets of Ironized Yeast from drugist today. Feel great tomorrow. If not delighted, manufacturer refunds your money.

Little Helps For This Week

"They that seek the Lord shall not want any good thing."—Psalm xxxv, 10.

Father! replenish with Thy grace. This longing heart of mine; Make it Thy quiet dwelling-place, Thy sacred, inmost shrine! Forgive that oft my spirit weaves Her time and strength in trivial cares; Enfold her in Thy changeless peace, So she from all but Thee shall cease. —Angelus Silesius.

God is Alpha and Omega in the great world; endeavour to make Him so in thy little world. Make Him thy evening epilogue and thy morning prologue; practise to make Him thy last thought at night when thou sleepest, and thy first thought in the morning when thou awakes; so also when thy fancy be satisfied in the night, and thy understanding rectified in the day. So shall thy rest be peaceful, thy labors prosperous, and thy death glorious.—Quarles.

Worms cause fretfulness and rob the infant of sleep, the great nursing Mother. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Mauna Loa, in Hawaii, is the largest active volcano and mountain-mass in the world.

Use Minaud's for Burns.

The Spaniards were among the early explorers of the coast of Southern Alaska.

Gyproc Gives PERMANENT PROTECTION

MADE FROM Gypsum rock, Gyproc Wallboard does not burn. And this year it has a new smooth Ivory finish that needs no decoration (when panelled) although you can tint, paper or plaster it if you wish.

Structurally strong, inexpensive, easily and quickly put up, Gyproc Wallboard gives permanent fire protection to the walls, ceilings and partitions of your home.

Your dealer's name is listed below. Ask him for complete details of this pioneer Canadian fire-safe Gypsum board or write for free interesting book, "Building and Remodelling with Gyproc."
